STUDENT / START

Help in four steps.

Help type, location, review and response each have their own phone screen.

Help choices up front

Medical, unsafe, fire, lost and Not sure are visible at once. Location is one tap above them.

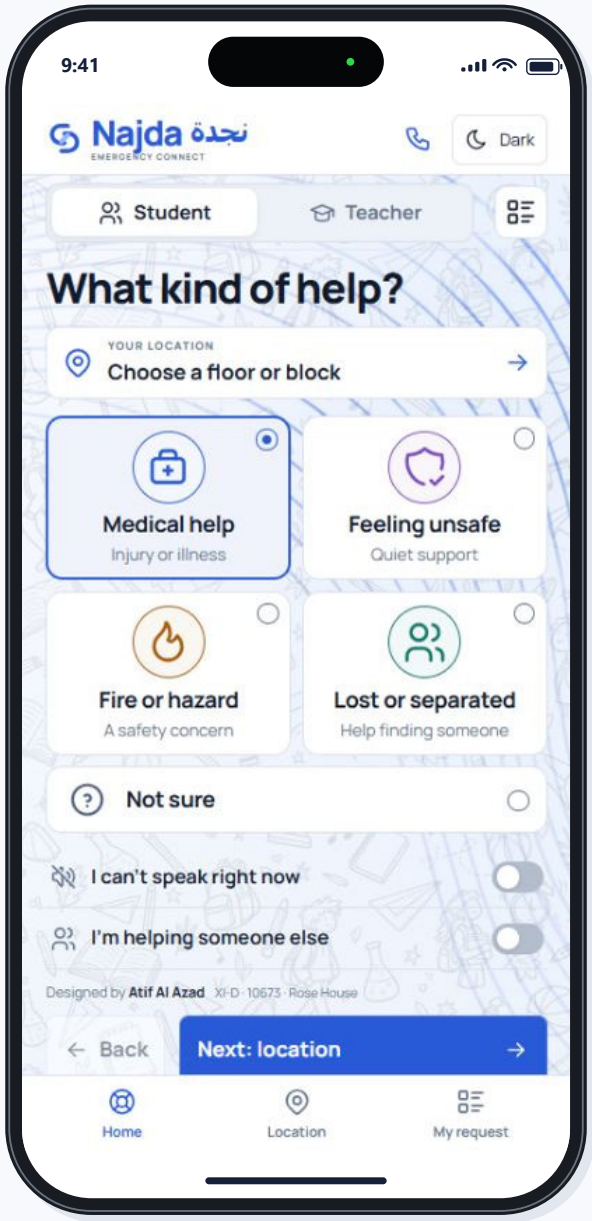

Large, distinct choices

Four large emergency icons and a Not sure option fit together. Medical help is selected to start. The logo and waves follow the selected help type.

01 / HELP TYPE

02 / LOCATION

STUDENT / REVIEW

Know what you send.

Large floor and block choices sit on a dedicated location screen. Check the request before sending.

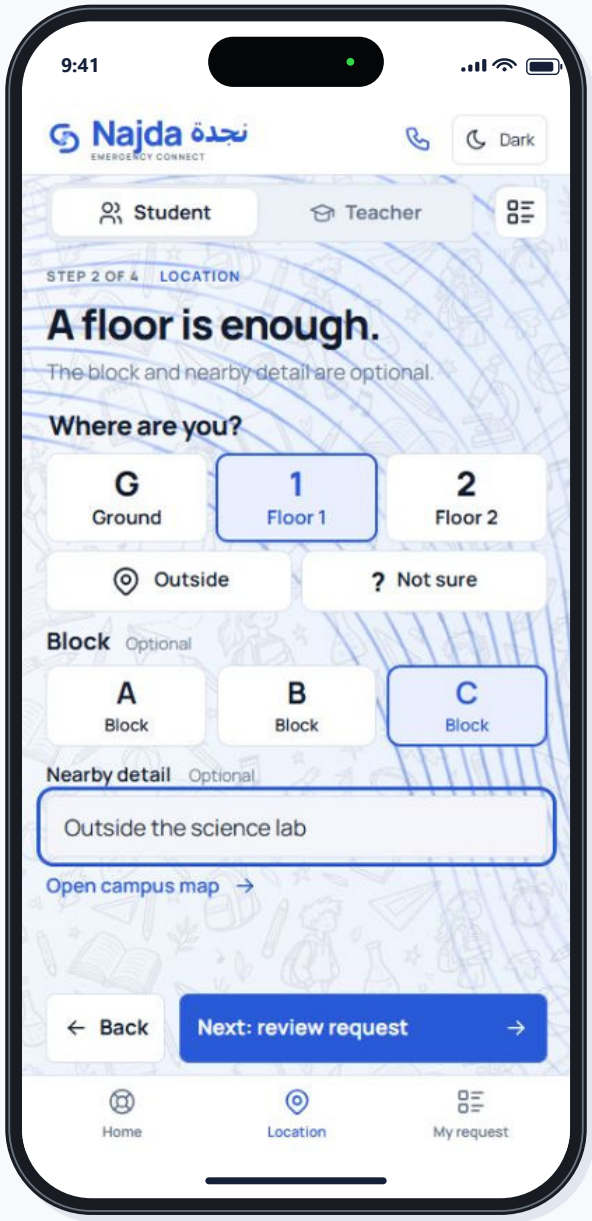

Easy to move through

Visible Back and Next controls preserve your choices.

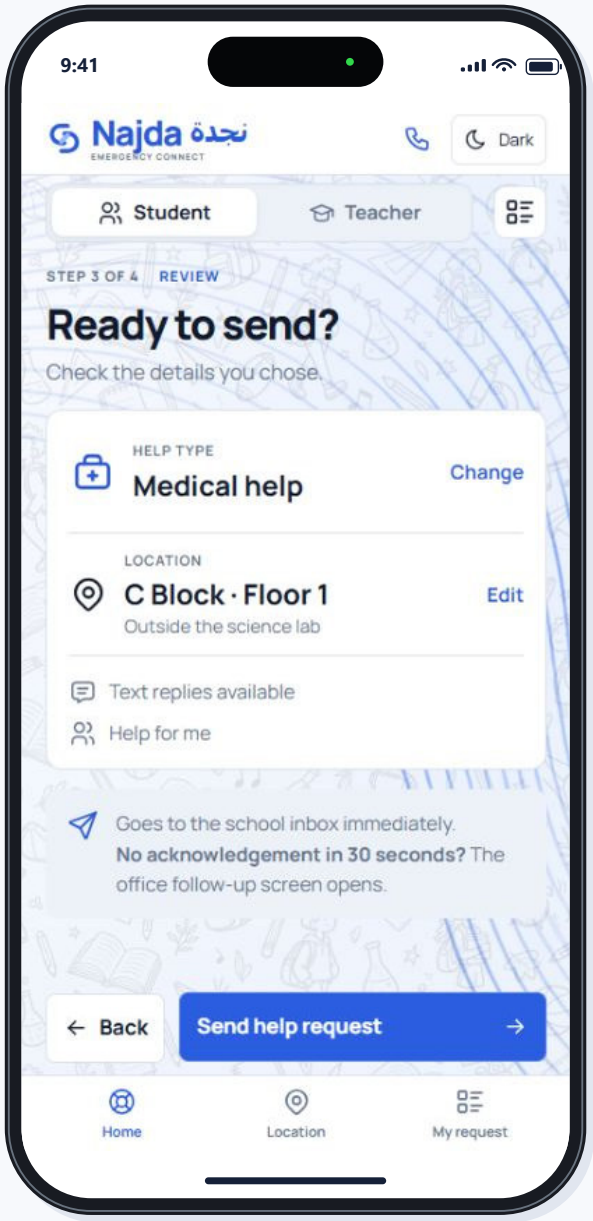

No page scrolling

The main phone screens fit the viewport. Actions remain below the content, without covering it.

03 / OPTIONAL DETAIL

04 / REVIEW

RESPONSE / ESCALATION

A visible next step.

An unanswered request opens the office follow-up screen after 30 seconds.

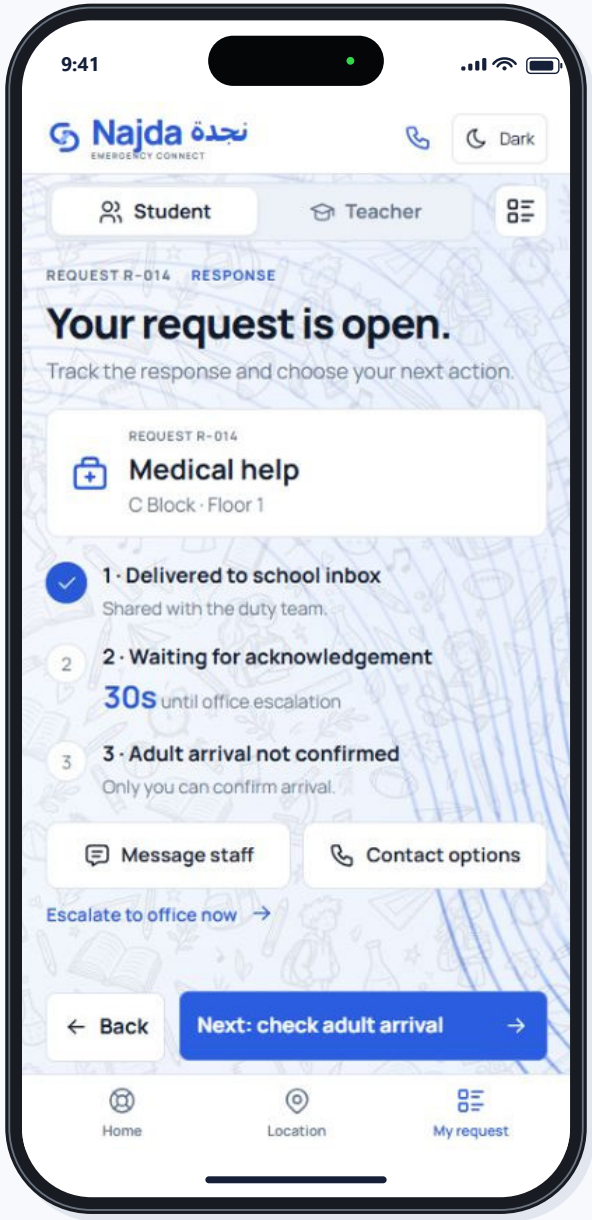

A countdown you can see

Delivery, acknowledgement and adult arrival are separate steps.

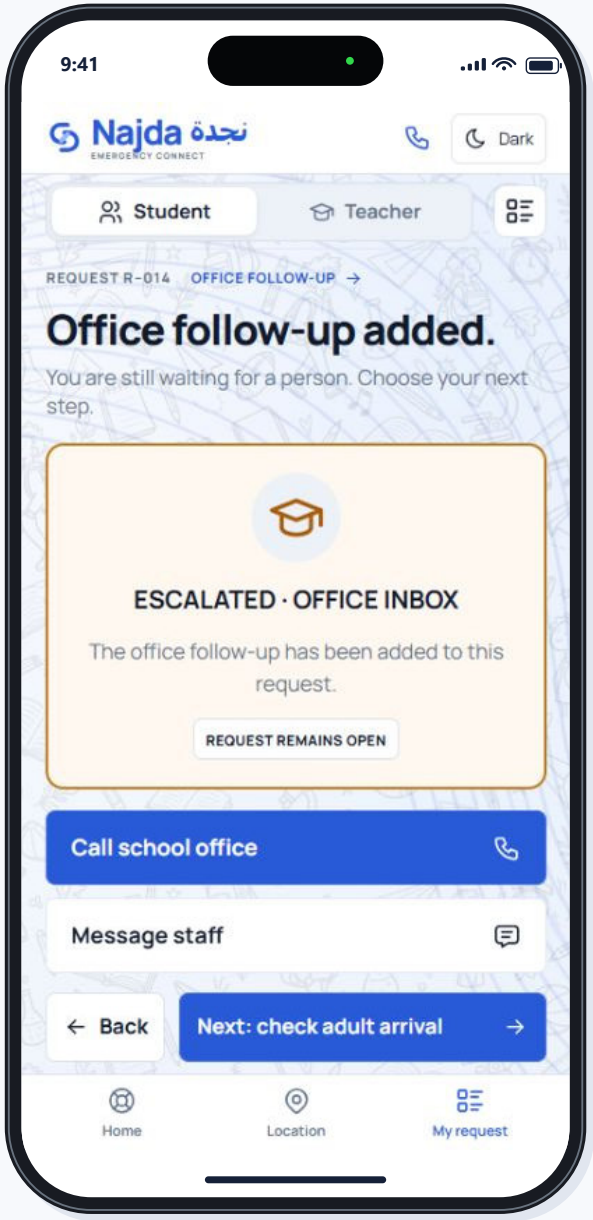

Follow-up stays actionable

Call the school office, message staff or check whether an adult has reached you.

05 / RESPONSE

06 / OFFICE FOLLOW-UP

RESPONSE / STILL WAITING

No adult? Keep it open.

Neither arrival answer is preselected. A timer never confirms handover.

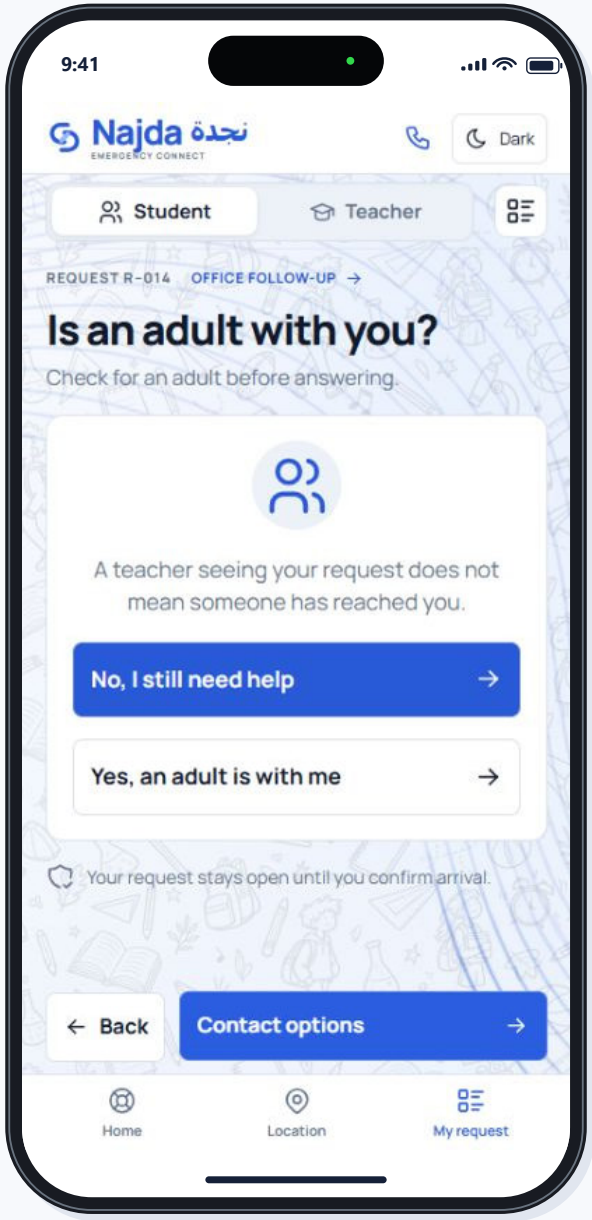

No means follow up

The request and location stay active. The duty inbox is marked Student still waiting.

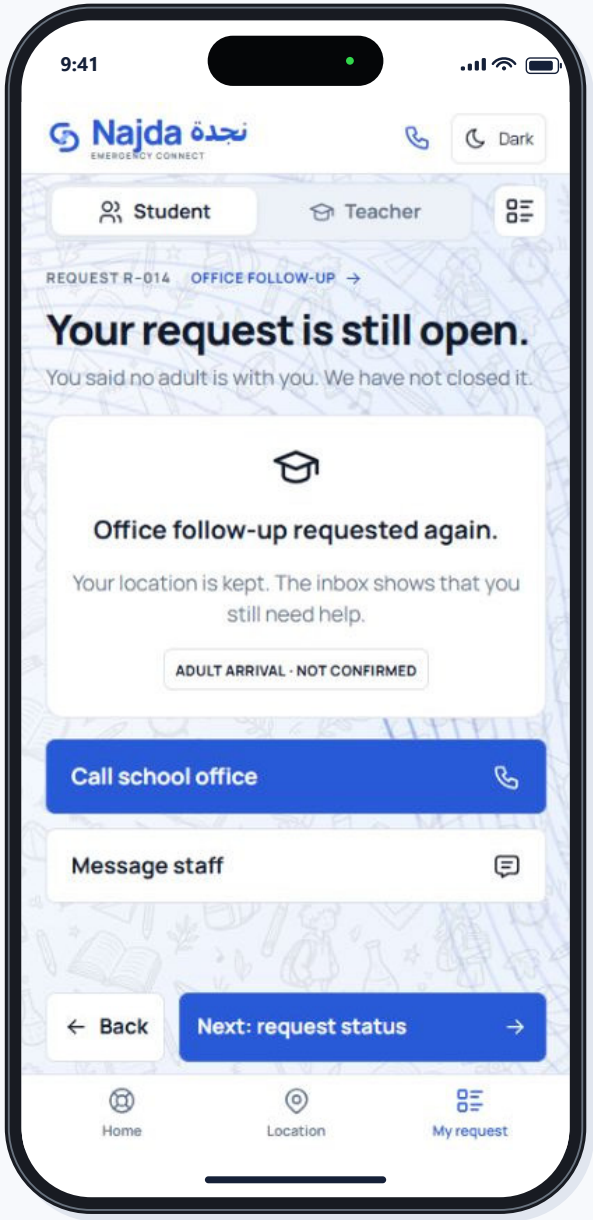

Yes needs confirmation

Only an explicit handover confirmation closes the request and clears the location.

07 / ARRIVAL CHECK

08 / STILL WAITING

CONNECTION / SUPPORT

A way to reach someone.

Direct calls and text remain available while the request is open.

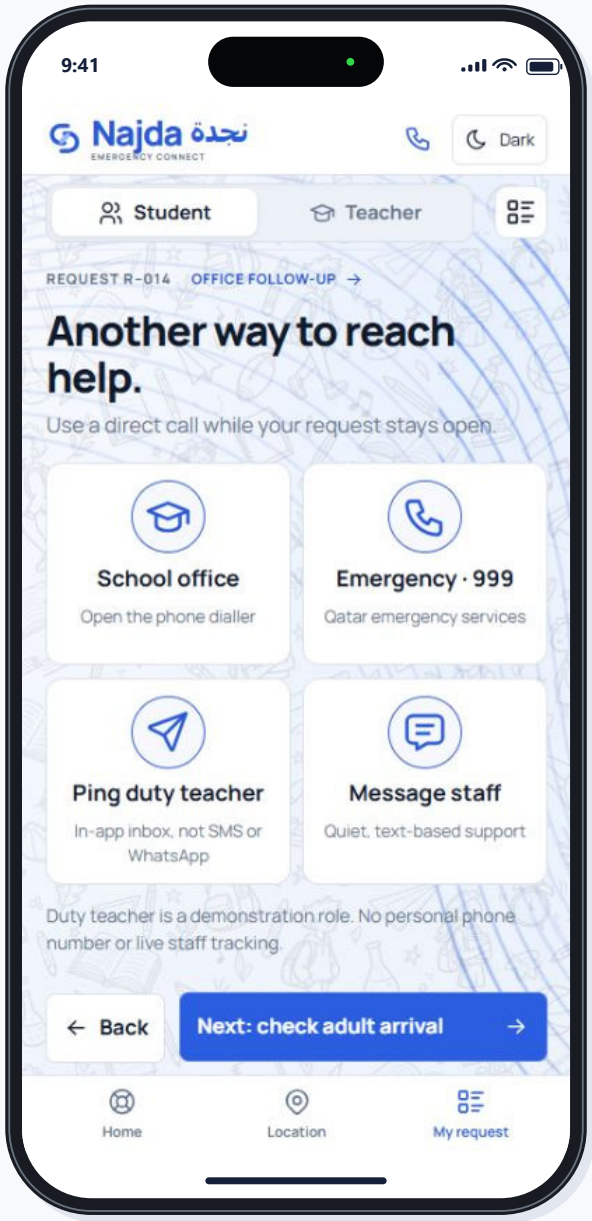

An explicit ping channel

A ping is an in-app inbox notification, not SMS or WhatsApp.

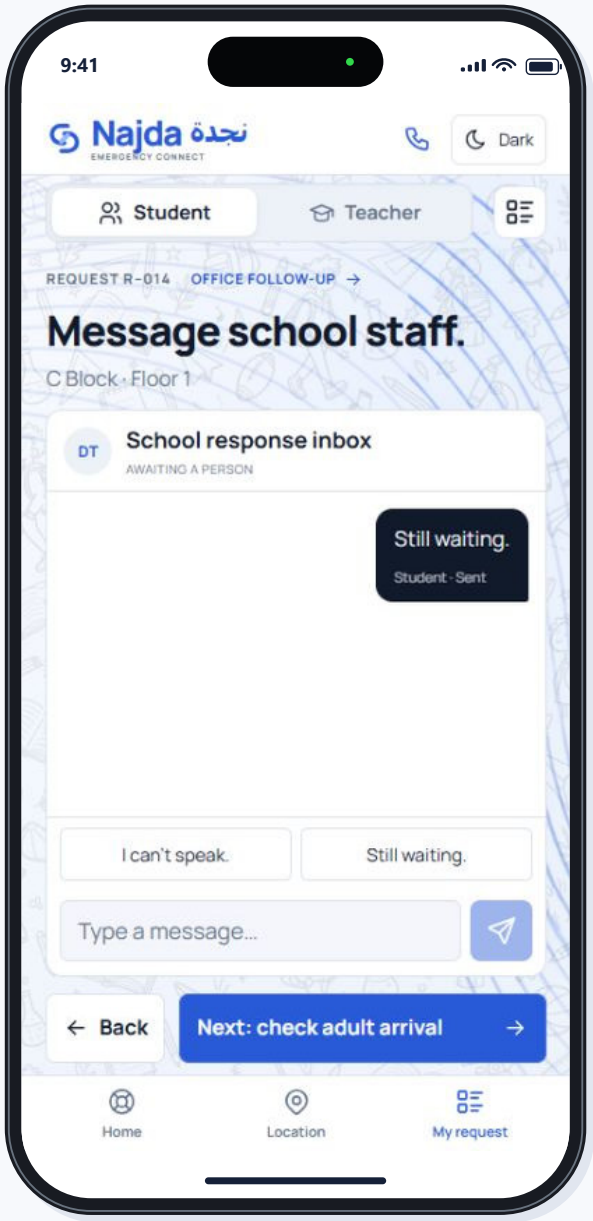

A quiet connection

Quick replies and messages can be sent before a teacher acknowledges. No staff positions are tracked.

09 / CONTACT OPTIONS

10 / STAFF MESSAGES

TEACHER / RESPONSE

The other side of help.

The shared inbox shows requests immediately, including students who are still waiting.

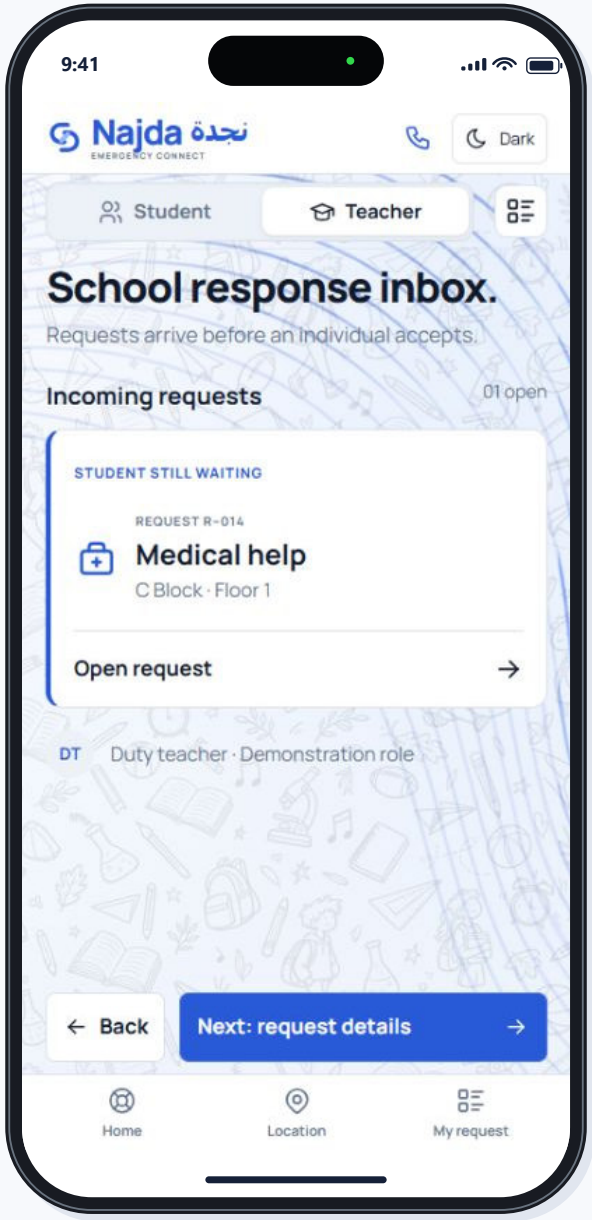

A generic duty role

No personal teacher name or phone number is included.

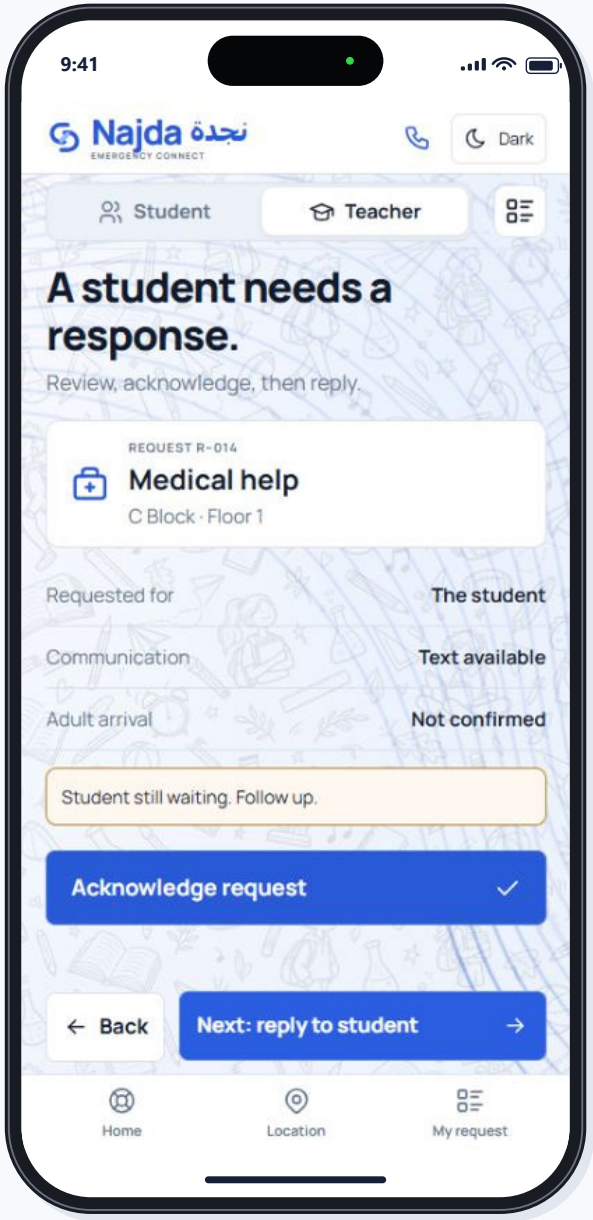

Responsibility, then reply

Acknowledge the request and message the student. Adult arrival remains unconfirmed.

11 / DUTY INBOX

12 / REQUEST DETAILS

HANDOVER / COMPLETION

Seen is not the same as safe.

Acknowledgement and handover are deliberately separate.

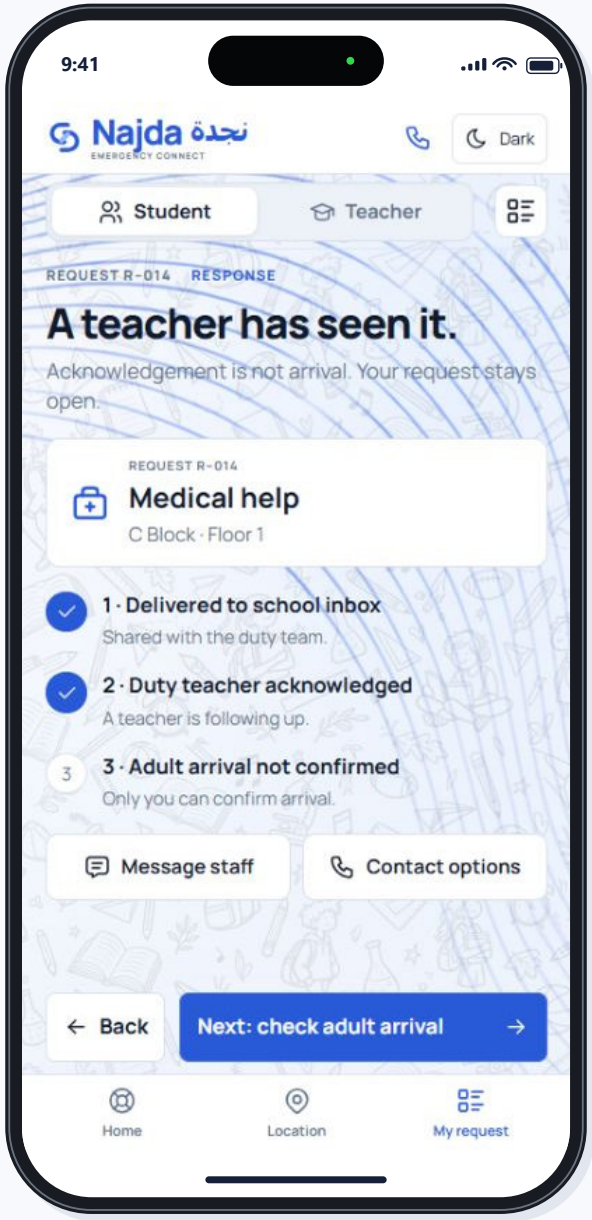

Arrival stays pending

A teacher seeing the request does not close it.

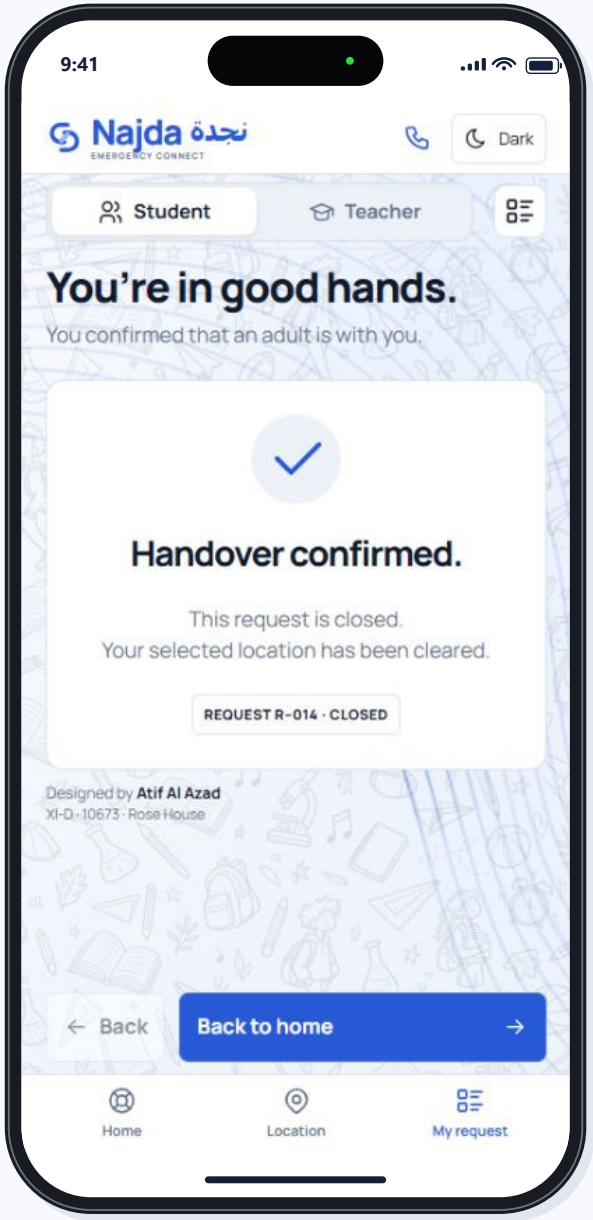

Close after meeting an adult

The student confirms handover. Only then is the selected location cleared.

13 / ACKNOWLEDGED

14 / HANDOVER COMPLETE

RELIABILITY / OPTIONAL DETAIL

Clear about what is known.

The exterior map is optional. Connection failure stays visible.

A floor is enough

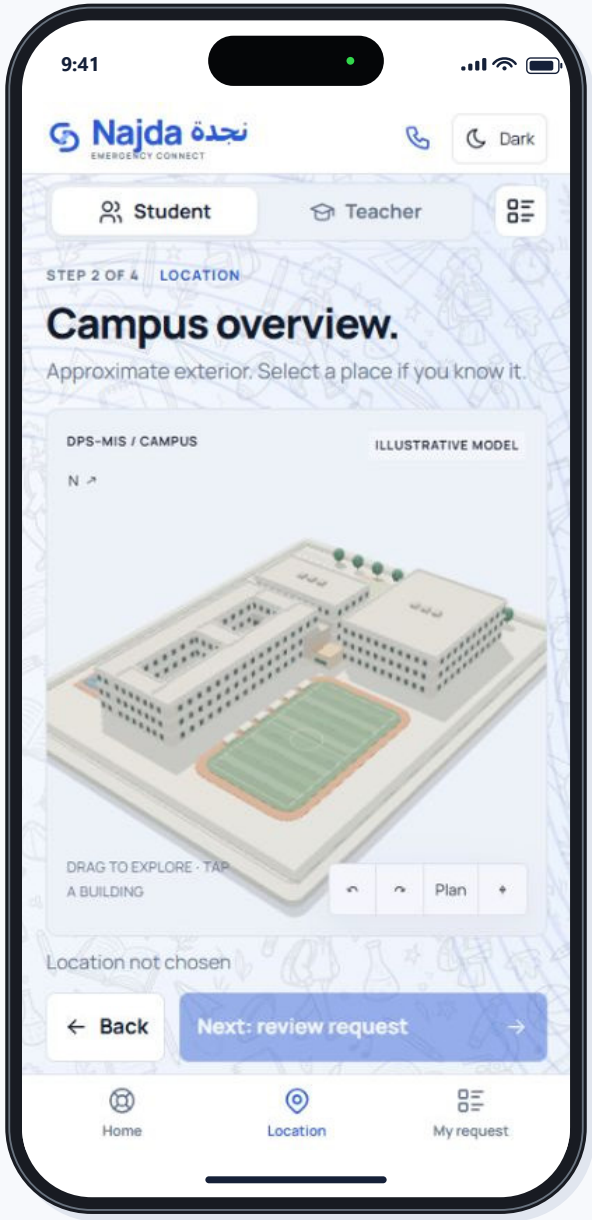

The campus model is approximate. There are no invented room plans or live positions.

Unsent stays unsent

Details remain available for retry. Direct-call options are still accessible.

Requests, pings and office escalation are simulated. Live delivery and the timing policy require school approval.

15 / CAMPUS OVERVIEW

16 / CONNECTION LOSS
